**ABSTRACT**

A one-piece garment which is simple in arrangement and handling related to opening/closing operation and which is arranged so as not to cause any problems in mobility of the body, includes a tight-fit garment which is formed in an integrated manner from a neck seal part at an upper part up to leg accommodating parts at a lower part, a zipper for putting on or taking off the garment is installed on a back part of the body in a horizontal direction at a region equal to a height of  $\frac{1}{2}$  of the upper part in a vertical-direction region from armpits to the waist part and the zipper is also installed in a state extending from flank parts on both sides of the body to the front part of the body.
